PROFESSIONAL SUMMARY

AI/ML Engineer with 9.56 CGPA and 6+ months architecting production-grade full-stack AI systems. Expertise in LLM orchestration, multi-agent systems, RAG pipelines, and real-time data engineering. Cognizant Technoverse 2026 Hackathon Winner (3rd Prize). Proven track record delivering measurable business impact through scalable solutions and technical leadership.

EDUCATION

KARUNYA INSTITUTE OF TECHNOLOGY & SCIENCES B.Tech in Artificial Intelligence & Data Science CGPA : 9.56/10	Coimbatore, Tamilnadu Expected May 2027
SHN GIRL’S HIGHER SECONDARY SCHOOL Secondary and Higher Secondary HSC: 88.5%	Sivakasi, Tamilnadu Jun 2021 – May 2023

TECHNICAL SKILLS

AI & LLM: LangGraph, CrewAI, Groq API, Google Gemini, RAG Pipelines, Agentic-AI, Ollama
Backend: FastAPI, Django, Flask, Express.js, REST APIs, WebSockets, Real-time Workflows
Frontend: React.js, TypeScript, Tailwind CSS, Responsive Design
Cloud & DevOps: AWS, Docker, Firebase, Git/GitHub, CI/CD, Render
Data & ML: TensorFlow, PyTorch, YOLOv8, SAM2, Apache Kafka, Power BI, scikit-learn
Databases: MongoDB, PostgreSQL, MySQL, Neo4j, Firebase, Supabase

EXPERIENCE

- Software Development Intern | GMS SoftTeam Solutions** (Jan 2026 – Present)
- Develop internal web-based testing tool with React; enhance system functionality and optimize UI consistency
- Front-End Development Intern | INLIGNX Global** (Jul 2025 – Aug 2025)
- Developed responsive React.js applications with state management, filtering, and mobile-first design
- Web Development Intern | AIIMTECH Software Systems** (Jun 2024 – Jul 2024)
- Built responsive web applications using HTML5, CSS3, JavaScript, PHP; improved UI consistency and usability
- Technical Mentor | Karunya Institute of Technology & Sciences** (Jul 2025 – Present)
- Mentor junior students in programming fundamentals, data structures, and problem-solving methodologies

FEATURED PROJECTS

- DrugTrace – AI Drug Repurposing Platform [Hackathon Winner]**
FastAPI, LangGraph, Neo4j, NVIDIA NIM, LLaMA 3.1 70B, React | github.com/Danishprabhu04/drugtrace
- Architected multi-agent AI platform with 8 specialized agents; integrated Neo4j knowledge graphs and NVIDIA NIM; achieved 40-60% latency reduction with real-time drug ranking
- Vehicle Detection for Gas Stations – Computer Vision**
FastAPI, YOLOv8, SAM2, PaddleOCR, React, WebSockets | github.com/vasuki2756/vehicle_detection-for-gas-stations
- Built real-time vehicle detection system (18-22 FPS); 96% accurate license plate recognition; interactive React dashboard with Twilio WhatsApp alerts
- AI Interview Readiness Simulator**
FastAPI, React, MongoDB, Groq API (Llama 3.3 70B), RAG | github.com/vasuki2756/Formal-candidate-analysis-and-interview-workflow
- Developed AI app comparing resumes with job descriptions; AI-driven skills gap detection; intelligent interview question generation with comprehensive answer evaluation

SitePlanner – AI Construction Planning Platform

React, FastAPI, PostgreSQL, Firebase Auth, scikit-learn | github.com/vasuki2756/site-planner

- AI-assisted construction planning with predictive delay-risk scoring; rule-based feasibility validation with dependency checking and resource constraints

Real-Time AQI Pipeline – Data Engineering System

Python, Apache Kafka, MySQL, Power BI, Docker, Lambda Architecture | github.com/vasuki2756/AQI-Pipeline-Kafka-MySQL-PowerBI

- Production-ready data pipeline for real-time Air Quality Index monitoring; Apache Kafka with Zookeeper coordination; Power BI executive dashboards

EventNest – Event Management Application

React, Express, MongoDB, JWT Authentication

- Full-stack event management with REST APIs, JWT authentication, and responsive React interface

CERTIFICATIONS

- Building AI Agents with MongoDB – MongoDB University
- MongoDB Python Developer Path – MongoDB University
- Microsoft Azure AI Fundamentals (AI-900) – Microsoft Azure
- AWS DynamoDB Fundamentals – Infosys Springboard
- Java Programming Fundamentals – Infosys Springboard
- Programming Essentials in Python – Cisco Networking Academy
